Describe your Drinking-Water System

The Corporation of the Town of Pelham operates a water distribution system which is supplied with treated water by the Regional Municipality of Niagara from the Welland Water Treatment Plant, located at #4 Cross Street in Welland. The source of the water for the treatment plant is the Welland Recreational Waterway.

The treated water is transported to the Town by way of a 750mm diameter watermain to the Shoalts Drive Reservoir located at #5 Shoalts Drive in Fonthill. Water is distributed from the reservoir by way of a series of watermains and a Regional elevated tank located at #177 Highway #20 West in Fonthill, to lands within the designated service area.

The Town of Pelham distributes drinking water to Fonthill and Fenwick urban areas in Pelham through approximately 86 kilometres of watermain varying in size from 50mm to 400mm diameter. In addition there is 6.5 kilometers in length owned by the Regional Municipality of Niagara which is connected to the Pelham Distribution System and also distributes water to lands within the service area. The watermains are primarily cast iron, asbestos concrete, high pressure concrete piping, copper and PVC piping. There are approximately 591 hydrants and 718 valves located throughout the system. The Town owns a fill station with side-fill and a backflow prevention device and a residential pressure boosting station.
